CONTENTS

No. 1 (DECEMBER, 1932)

Original Articles: PAGE

44. A Study of Some Points of Conformation and Milk Yield in Friesian Cows. F. H. GARNER 1

45. The Ayrshire Breed of Cattle: A Genetic Study. A. B. FOWLER 11

46. The Effect of Nine-, Twelve- and Fifteen-Hour Intervals during the Day and the Night on Milk Production. K. W. D. CAMPBELL 28

47. The Errors Involved in Certain Methods of Estimating the Lactation Yield of Milk and Butterfat. J. HOUSTON and R. W. HALE 37

48. Investigations on the Milk of a Typical Herd of Shorthorn Cows. I. J. GOLDING, J. MACKINTOSH and E. C. V. MATTICK 48

49. The Influence of Bacilli of the Colon Group on the Production of Acid by Lactic Streptococci in Milk. H. R. WHITEHEAD and G. A. COX 74

50. Studies in the Metabolism of the Lactic Acid Bacteria. I. Nitrogen Metabolism. J. G. DAVIS and A. T. R. MATTICK 81

51. The Plate Method of Estimating the Bacterial Content of Milk—the Limitations of Procedure in Common Use, with Suggested Improvements. J. F. MALCOLM . . 91

52. The Bacteriological Examination of Milk. I. Modification of the Agar Plate-Count Method. II. The Use of the Methylene Blue Reductase Test at 15·5° C. as a Method of Determining the Keeping Quality of Milk. E. R. HISCOX, W. A. HOY, K. L. LOMAX and A. T. R. MATTICK 105

53. Factors Affecting the Solubility of Milk Powders. I. The Effect of Heat on the Solubility of Milk Proteins. N. C. WRIGHT 122

54. The Distribution of Nitrogen in Milk with Reference to the Solids-not-fat Content. W. L. DAVIES . . . 142

55. The Distribution of Salt in Cheddar Cheese. F. H. McDOWALL and L. A. WHELAN 147

Biennial Reviews of the Progress of Dairy Science:

Section A. The Physiology of Dairy Cattle 154

I. Growth (by G. L. PESKETT) 154

II. Lactation (by J. D. STIRLING) 156

III. Nutrition: (*a*) Digestion (by S. MORRIS) . . . 163

(*b*) Feeding Standards (by J. MACKINTOSH) . . 165

IV. Genetics (by A. D. BUCHANAN SMITH and OLIVE J. ROBISON) 170

Note 176

311831

Agric. 1Ap36 Herd 2. 1.76

No. 2 (JUNE, 1933)

Original Articles: PAGE

56. The Nutritive Value of Proteins for Milk Production. I. A Comparison of the Proteins of Beans, Linseed, and Meat Meal. S. MORRIS and N. C. WRIGHT . . . 177

57. A Bacterial Milk Taint. A. CUNNINGHAM . . . 197

58. Coliform Organisms in Milk and Bovine Faeces. P. M. KON 206

59. Studies in the Bacteriology of Low-Temperature Pasteurisation. I. The Significance of Heat-Resisting Organisms in Raw Milk Supplies. E. B. ANDERSON and L. J. MEANWELL 213

60. Discoloration in New Zealand Cheddar Cheese. Muddy, Pink and Bleached Defects. I. Bacteriological Investigations. G. F. V. MORGAN 226

61. Discoloration in New Zealand Cheddar Cheese. Muddy, Bleached and Pink Defects. II. Biochemical Investigations. G. M. MOIR 238

62. Variation in the Composition of Milk in Certain Midland Districts of England during the Years 1923–31. A. G. BAKER and H. T. CRANFIELD 246

63. The Mode of Combination and Distribution of Traces of Heavy Metals in Dairy Products. W. L. DAVIES . . 255

64. Factors Affecting the Solubility of Milk Powders. II. The Influence of Temperature of Reconstitution on Protein Solubility. G. R. HOWAT and N. C. WRIGHT . . . 265

65. The Composition of the "Isotonic Diluent" in Samples of Milk low in Solids-not-fat. W. L. DAVIES . . . 273

66. Some Observations on Cow's Milk poor in Non-fatty Solids. G. L. PESKETT and S. J. FOLLEY 279

Biennial Reviews of the Progress of Dairy Science:

Section B. Bacteriology and Mycology applied to Dairying. I. Technique of Milk Examination. II. Saprophytic Flora of Milk and Milk Products. III. Pasteurisation of Milk. IV. Butter. V. Cheese. A. T. R. MATTICK, E. R. HISCOX and M. I. CHRISTIAN 285

The Trend of Production and Trade in Milk and Milk Products 317
